- ◆ Adobe Suite
- ◆ Final Cut Pro

Experience

Drupal Web Developer for Midnet Media in Minster, OH

08/14 - Present

Using the Drupal CMS, my primary job focuses on coding websites and crafting them so that they're not only client-friendly on the front-end, but also mobile-friendly. Other jobs include assisting clients with content updates on their websites, troubleshooting, and providing email and technical support.

Student Coordinator for the Student Technology Assistance Center at BGSU

05/12 - 05/14

I was tasked with overseeing student employees in the creation and delivery of in-house advertising projects for either the office itself, or other campus branches. I was also in charge of setting up workshops — which were in-class tutoring sessions for students (and occasionally professors) — where we would demonstrate how to use certain programs ranging from the Adobe Suite, iLife, Microsoft Office, and the Blackboard and Canvas LMS.

Digital Media Assistant for the Academic Resource Center at BGSU

05/11 - 05/12

My job as a Digital Media Assistant was to assist students and staff with any program-related questions, and to create and maintain tutorials for all of the applications that we supported.

Education

- ◆ Graduate of Bowling Green State University with a B.S. in Technology.
- ◆ Graduate of Anna High School.
